1 Wheel Alignment Service Per Day Can Pay For Your Machine

Do you have at least 1 customer per week requiring Wheel Alignment services? Then you need to invest in your own Wheel Aligner. Our Active Plus WS Wheel Aligner is the best on the market for many reasons as it features a lowered spoiler mode, has a database built in the system from 60's to present day, features an 8-24 inch clamping with quick release clamps and has the ability to email reports direct to your customers.

It comes complete with 1 control unit complete with PC, monitor, key-board, printer and battery-charger, 2 front measuring heads, 2 rear measuring heads, 1 brake pedal depressor, 1 steering wheel lock and an instruction manual.

Total 'on vehicle' operation with the keyboard with remote control

→ Extremely Practical

Can be used on 2 post lifts, mid rise lifts, pits, 4 post lifts and more.

→ Smartphone / Tablet Mirroring

Can be used via a smart phone / tablet to mirror the digital screen for rear axel adjustments or when working on a pit.

→ Number Plate Recognition

The innovative number plate recognition feature allows the system to be aware of the alignment tolerances for specific vehicle makes & models & is a far quicker way to search for a vehicle.

→ Email Reports Direct To Customers

The machine also has the ability to send email reports directly to your customers to allow them to have a full breakdown of how your service has helped them.

→ Remote Control Function

The keyboard with remote-control function provides total "on vehicle" operation.

→ Bluetooth

Data Bluetooth transmission allows maximum mobility between different working positions.

A&P Motorcare Ltd ★★★★★

Just purchased a new wheel alignment system from V-Tech, after the demo from the team who are very knowledgeable about the equipment and very informative when showing us how the equipment works. The aligner is a game changer for our company with its ease of use and time-saved setting up on the vehicle.
